## Project

### Verification of Drivers with Driver's API.

using DL.NO and DOB, we will also try to verify faces (first we capture the image of driver using webcam)

then verified the DL image & ~~OK~~ photo.

According to current record system all of the incident are tracked in papers as hard copy.

So to get the past history of a driver people have to search in all these files and much time waste on this

# HOME PAGE

Login

(Search ~~about~~ DL)

(Search VN)

Here we can search about driver's past history.

- Drivers have Driving license or Not?
- History of Drivers (Safe Driver or Not)?

- VN to know the challan on vehicle  
(to know ki jis vehicle mein ham travel karne wale hain wo safe hai ya nahi)

Ex: OLA, Uber fab ham book karne hain

to VN ajata hai to ham (site) jo hamne create ki hai us par jakar check kar sakte hain.

future scope agar challan ha to pay bhikar sake

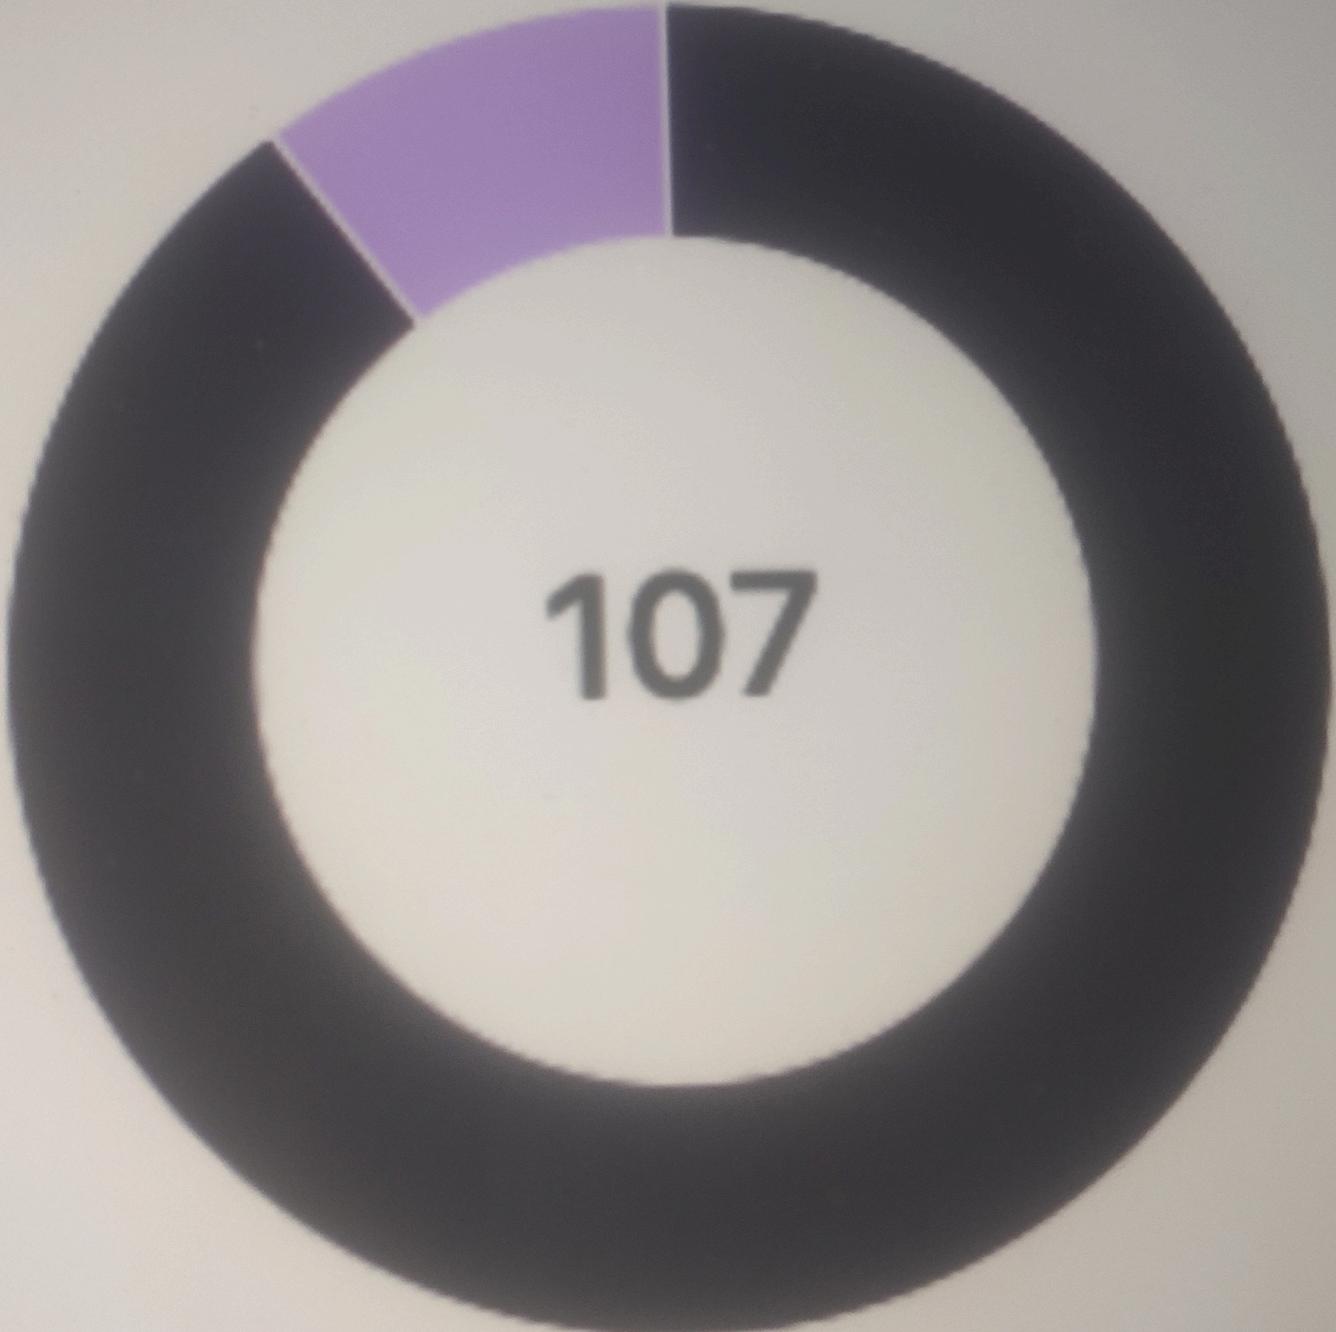

also  
in Driver case

Here we provide the points of violence section.

When driver signed up it will get 300 marks, and upon the breaking rules the point will be deducted, we will also update the points after every deduction.

When the point will become zero then driver will get a warning notification / SMS. ~~when~~  
after 0 if he/she will again violate the rule, then their EPL will be suspended for 15 days. ~~for 15 days~~ / block

# Traffic Police
